

Building a Script

LPI Linux Essentials (010-160)

Objectives

At the end of this episode, I will be able to:

1. Identify the basic building blocks of a bash script.
2. Create a bash script from scratch.
3. Execute a bash script from the Linux command line.

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

Sample Script

```
#!/bin/bash
tar cvzf /home/dpezet/backup-$(date +%Y%m%d).tgz /home/dpezet/Documents
echo "Backup Complete"
```
